ALDE COMPACT 3030 AND 3030 PLUS

Enjoy even more freedom on holiday

with Alde's hydronic heating systems

Alde Compact 3030 Plus

Alde – home-from-home comfort

When you are away travelling you should be comfortable, which means comfort on a par with home. You shouldn't have to choose. Alde's heating systems provide cosy, silent and even heating.

The two new boilers, Alde Compact 3030 and 3030 Plus, are the result of continued development of our popular hydronic boilers. We are now taking thermal comfort to the next level, giving you, among other things, longer showers and the ability to control di□erent temperature zones.

Heating and hot water in one

With Alde, you not only get to enjoy comfortable warmth in the vehicle, but also hot water. Our built-in 10-litre water heater ensures you always have plenty of hot water for a shower and the kitchenette.

The boiler runs on electricity or LPG, but if you need extra heating, you can choose to combine both to obtain as rapid heating as possible.

One boiler – numerous possibilities

- ✓ Silent and even heating
- ✓ Perfect for year-round use
- ✓ Heating and hot water from a compact 2-in-1 solution
- ✓ Low 12 V power consumption

Thermal comfort with an enhanced premium feel

Like at home or even better. We never stop looking at ways to optimise and refine thermal comfort in your leisure vehicle. That is why the Alde Compact 3030/3030 Plus now includes Alde ICT (Alde Intelligent Climate Technology). This system delivers smooth and e□cient temperature transitions, energy optimisation and automatic climate control. You also have the option to choose di□erent settings for night and day.

Adjust the heat in di□erent spaces

Maybe you'd like it to be cooler in sleeping areas, but a little warmer in social spaces? The option of two di□erent zones enables you to set the temperature that best suits your needs. This not only improves your overall comfort – it also reduces your LPG or electricity consumption. Our multi-zone system gives you optimal thermal comfort.

Shower more and for longer

You shouldn't have to limit what you do on holiday. With the Alde Compact 3030, we have increased the hot water capacity by around 20 per cent. You can remain independent and won't have to wait for a shower cubical to come free in the shower block. Make full use of the freedom your leisure vehicle o□ers.

Easy to control temperature, hot water and zones

Our new control panel is simpler, more modern and easier to navigate. It should be easy to choose your preferred energy source and set the indoor temperature or hot water level.

ALDE COMPACT 3030 PLUS

Continuous hot water

Away with the family or perhaps you just like taking a long shower? The premium version Alde Compact 3030 Plus provides additional hot water capacity and continuous hot water if needed. What a luxury!

FUNCTIONS	COMPACT 3030	COMPACT 3030 PLUS
